

# PROJECTS IN ARABE COUNTRIES

Building dreams since 1986

ALL designs are made with  
Autoclaved Aerated Concrete

Load-bearing and non load-bearing systems

# VILLAS DESIGN

MHofmann Engineering Consultancy

MHE Group's Engineering and Designing part

A villa is used to be an ancient Roman upper-class county house. Today, it is seen as a luxurious and comfortable lifestyle.

Some, are visited for vacation or relaxation purpose, while some are for temporary or permanent habitation. They're specifically designed in a luxurious manner, quite a number of them can be found in Arabe countries such as Dubai and Abu Dhabi where we contributed in the design. We at Mhofmann Engineering consultancy hope to spice up your life style by providing breath taking designs for villas in Libya and to ensure comfortable living for indigenes and visitors. We promise a convenient living condition by seeing that you have just the right design for your villa.

VILLA DUBAI - AAC BUILDING

# QUASR AL ARAB

## ENGINEERING DESIGN

We provide modern sustainable architectural design, complete with engineering and interior design services. Our integrated approach includes technical feasibility studies as well as financial studies to ensure that projects schedules are optimized and costs minimized.

# MHE AAC PLANT ENGINEERING

- Plant maintenance - updating or renewing
  - Plant Expansion – adding
  - New product Development – new plants
- 
- *We design and engineer to all Building codes and have successfully designed engineered AAC Buildings in all Continents.*

# Our Unique System

MHofmann Engineering Consultancy

One of our core strengths is having the ability to coordinate and communicate clearly with all parties involved in the project. Project managers ensure that the client is aware of all progress updates from the very beginning to the very end.

Clients prefer to delegate the entire construction project under one roof so that they can focus on other important things and not become distracted with an entirely new process, which could be a lot for new project starters. This means that every single aspect of the project is managed by only one company.

We M.Hofman Engineering Consultancy take big pride and gratitude in walking clients through the entire construction process. From planning/design to executing the project, we create smooth transitions for all parties throughout the entire process. We are grateful for all the trust provided by our clients.
